Subject: frightened by failure of the proposed Microsoft Settlement to address and deter unlawful activities

As an American citizen and consumer, I am troubled and frightened by the failure of the proposed judgement to address findings in the Microsoft antitrust case. THIS JUDGEMENT FAILS TO IMPOSE ADEQUATE REMEDIES TO THE CASE FINDINGS, and fails to utilize the broader range of remedies that may be legally and prudently availed.

There is NO EVIDENCE THAT THE PROPOSED REMEDIES are adequately punish past illegal or WILL PREVENT FUTURE HARMFUL, ILLEGAL ACTIVITY. It is frightening to consider what lesson might be taken from this failure by other potential monopolists and economic bullies. Is this a country of personal and corporate accountability, or not?

As a user of a broad range of computer software and hardware products, spanning the range of commercially available operating systems, I have found my FREEDOM to choose on the basis of PRICE and PERFORMANCE has been undermined by Microsoft's widespread and apparently instinctive work to the ILLEGALLY SUBVERT COMPETITION.

I request that my government pursue more appropriate and further means of PROTECTING THE AMERICAN PEOPLE AND ECONOMIC SYSTEM FROM MICROSOFT in this matter.

Thany you,

William A. Christens-Barry
